TO WHOM IT MAY CONCERN

Over the last eight years Symbion Health formally known as Mayne Health has been using Atlantic Plumbing and FMD services for all plumbing installations and plumbing repairs across our network of Laboratories and Collection Centres situated across the Sydney Metropolitan Area

Due to the kind of industry Symbion Health is associated in, Atlantic Plumbing has satisfied all our and our governing agencies recommendations and standards that apply when conducting work either being related to installation and/or to repairs around our centres.

Also our after hour needs and to a certain extent our routine needs are of a nature that require fast action to be resolved. Atlantic Plumbing has recognised this and has endeavoured to meet our needs accordingly providing a high priority response, which is greatly appreciated by Symbion Health.

The relationship between Symbion Health and Atlantic Plumbing is as strong as ever since the first dealings with Atlantic. The customer service and quality of the work performed are first class.

I have no hesitation in recommending Atlantic Plumbing and FMD services to any company or organisations.

Yours Faithfully
